

Abstract

5 A confectionery product (10) comprises on at least one of  
its surfaces (18), a first set of surface portions (20),  
a first graphic information being formed on the entirety  
of surface portions (20) of the first set, and a second  
10 set of surface portions (22), the surface portions (20)  
of the first set being arranged alternating with the  
surface portions (22) of the second set, and the surface  
portions (20) of the first set being arranged at an angle  
with respect to the surface portions (22) of the second  
set.

A corresponding mold for manufacturing a confectionery  
product and a method of manufacturing a confectionery  
product are provided accordingly.
